12 October 1983

MEMORANDUM FOR: Director, Intelligence Community Staff  
FROM: Deputy Director of Central Intelligence  
SUBJECT: Monthly Committee Reports for August 1983

1. I'm pleased that CAMS II System Development is progressing the way it is. Please keep the heat on this because I'm very uneasy. The integration systems tests will be a key. Don't let anyone let up.

2. On foreign language, please pursue the exploration you now have underway on use of the Weidner and Systran systems. They sound promising.

3. In addition to keeping track of where the world [redacted] is going with super computers, I would like the JAEIC to stay on top of efforts regarding detection of nuclear materials/ weapons in space.
